

**Logistics Toolbox** grew from the rigors of battlefield logistics to the rapid development of **Total Asset Visibility** capabilities after Operation Desert Storm and Bosnia. Anyone who has access to the Internet can now tap into this vast wealth of information that has taken years to develop and compile. Logistic Toolbox provides convenient links to logistics information based on the type of information you want. It is also a great place to find training and Desk Guides to many of the systems you could be using.

DLIS is now proud to present the only program that provides hands on training for DLA and Service unique systems in one convenient package. Based on a philosophy of using the right tool for the job.

This training is now available to you and your customers. Over the past year, training has been provided to MCAS Cherry Point, Corpus Christi Army Depot, Tobyhanna Army Depot and to many Navy units in Norfolk, San Diego, Pearl Harbor, Yokosuka JA and Naval Supply Corps School in Athens GA.

**If you are interested in bringing this training to your customers, just send an email to [logtool.dlis.dla.mil](mailto:logtool.dlis.dla.mil)**

Logistic Toolbox is “**One of a kind, must use... must bookmark website!**”
